

**PETITION – TRAFFIC CALMING DEVICE
CONSTRUCTION REQUEST**

TO: THE CITY OF MYRTLE BEACH, PUBIC WORKS DEPARTMENT:

We, the undersigned, being owners of record of property abutting

(Name of Street)

in Myrtle Beach, South Carolina, do hereby petition the City of Myrtle Beach to install traffic calming device(s) within the public right-of-way or right-of-way easements along the above-described street(s).

In so petitioning, we understand that we may be asked to dedicate permanent right-of-way easements and/or temporary construction easements to the City of Myrtle Beach for its use in constructing the project, that the project will not go forward unless and until all of such easements have been so dedicated, and it is our present intention to make such required dedications.

We further understand that the street must satisfy qualifying criteria to be eligible for new traffic calming device construction.

We further understand that the location and type of traffic calming device will be determined by the City of Myrtle Beach depending upon established implementation guidance, continuity of sidewalks in the area, topography, stormwater conditions, presence of trees/shrubs and other utility conflicts or economic considerations.

We further understand that no portion of the cost of construction of the project shall be assessed against the abutting properties in connection with the project, and no exactions other than dedication of easements shall be required of the abutting property owners as a condition of proceeding with the project.

We further understand that seventy-five (75%) percent of the abutting property owners along both sides of the street indicates their desire for the construction of a new traffic calming device.

It is further understood that only one property owner per property, including non-resident owners who are City of Myrtle Beach residents, must sign the petition and only one vote per property will be counted.

It is further understood that one hundred (100%) percent of all commercial, retail, and institutional facilities having access only by the street under consideration must indicate their desire for construction of a new traffic calming device.

Where a Variance or Capital Improvement Installation Agreement exists requiring construction of infrastructure improvements by property owners, the City may require property owner installation of these improvements at the time of construction of the petitioned new traffic calming device. [Variance or Capital Improvement Installation Agreements are currently in effect at:

We further understand that the same petition process for the installation of a traffic calming device must be followed should there be a request to remove an existing traffic calming device. It is further understood that if the construction of the traffic calming device was initially led by a Traffic Calming Construction Request petition, then the cost for removal is expected to be borne by property owners abutting the street.

Finally, we understand that the City reserves the right to proceed, or not to proceed, with the project, in its sole discretion. Shall this traffic calming device construction request satisfy all qualifying criteria, the Public Works Department will submit the Annual Traffic Project Priority List to City Council for their consideration. Traffic calming device installations may be approved by City Council motion and financially supported within the Capital Improvement Plan.

IN WITNESS WHEREOF, we, the undersigned petitioners, have executed the above and foregoing Petition this _____ day of _____, 20_____.

NOTE: Only one property owner per property, including non-resident owners who are Overland Park residents, needs to sign.
